Victor Balta

Senior Product Manager @ Rail Europe | Growth
Berlin, Berlin, Germany

Summary

I'm a practical product person who turns data into action. I dig into analytics, talk to customers, run experiments, and stay hands-on when I need to prototype ideas or build custom solutions.

At Virail, I led product for a global travel platform, driving CRO, SEO, and launching our mobile app while evolving from aggregator to full OTA. Now at Rail Europe, I lead B2C product, focusing on analytics, conversion optimization, and new revenue streams while building a data-driven culture.

I enjoy building mini projects to solve problems for myself or others. Built [stationboard.live](#) for faster Berlin transit checks without Google Maps bloat.

Previously built and sold [cretelocals.com](#), and currently working on [thermelust.com](#) and a few others.

Connect if you're building travel tech, data products, or AI solutions.

Always up for exchanging ideas with fellow PMs and founders.

Experience

Rail Europe

Senior Product Manager

March 2025 - Present (1 year)

Rail Europe is a global train booking platform founded in 1932. Each year it serves millions of travelers by providing easy access to train tickets and passes across Europe. The platform partners with more than 100 rail operators and distributors, helping customers find and book the best rail options for their journeys.

- Led product analytics initiatives to empower teams in making data-driven decisions.
- Established a structured experimentation framework for product analytics and conversion rate optimization (CRO).
- Supported SEO efforts through strategic input on visibility, traffic, and conversion growth
- Overseeing the ownership of website and mobile applications, driving monetization initiatives like insurance, affiliate programs, and pricing.
- Overseeing the implementation of a chatbot to enhance customer experience
- Contributed to the new company strategy by shaping culture and guiding teams toward a more customer-focused and data-oriented approach

Virail

4 years 11 months

Head of Product

August 2022 - February 2025 (2 years 7 months)

Senior Product Manager

April 2020 - August 2022 (2 years 5 months)

Berlin, Germany

Virail is a Berlin-based travel comparison service founded in 2012. Every year we help more than 35 million travellers find the perfect solution for their trips across the world. Our comparison tool works with more than 2000 transportation companies and lets you find the optimal travel solutions, no matter your needs.

Some of the things I do:

- User Experience
- CRO / AB testing / SEO
- API Integration
- Data Customer and Market Research
- Building new tools from scratch (0 -> 1)

European Medicines Agency

Product Manager

October 2017 - March 2019 (1 year 6 months)

London, United Kingdom

Helped to implement a Cloud Identity Platform (IdentityIQ SailPoint) for the Eudravigilance system, which enhanced account security, improved the service level agreement by 84%, and cut down the financial resources by 70%.

Liaised with the teams to oversee the product life-cycle and to analyse the business needs by eliciting requirements from multiple groups of stakeholders and translating them to the developers.

Optimised the data mastering process, which saw an improvement of 57% in metrics.

European Railway Agency

Data Analyst Trainee in the Corporate Management & Evaluation Unit
March 2016 - August 2016 (6 months)

Valenciennes

Developed a web app that helped my department to locate and sort the crowd-sourced data organised in excel files.

Provided data visualisation solutions by using ArcGIS software and JavaScript custom graphical representation.

Managed data on high-speed train stations across Europe.

Supported the development of Railways datasets and annual stakeholders reports.
